TELEHEALTH NETWORK UPDATE

Bridge Information

We hope that everyone has had the opportunity to connect to the new bridge. The new bridge address is: 72.15.191.206. Please connect to the IP VCR so that when you need to use it you will know how.

The IP VCR address is: 72.15.191.208.

Use your Far End camera control and the arrow keys to move through the options and programs available. The new bridge is larger and allows "meeting rooms". Meeting rooms do allow anyone to connect without notifying us who will be connecting ahead of time. A meeting room does still need to be scheduled ahead of time so that we can build it into the bridge, but this new feature will be nice for the ongoing meetings that occur with various HHA groups routinely. When you have a program or meeting that uses a meeting room, all you need to do is connect to the bridge address, 72.15.191.206, then add ## and the meeting room number. Here is an example of how the typed number would display: 72.15.191.206##1000.

We will assign a room number to each of these meetings so when the schedule is sent out, just check for the meeting room number. For your convenience, we will make every attempt to keep the meeting room number the same throughout the year for each of the designated groups. Please call us if you have questions about these new features.

REMINDER: All endpoints that have BryanLGH as their hub need to now connect through the BryanLGH bridge instead of UNMC. **

You can access these program offerings and more descriptions of these programs on the HHA web site at:

<http://www.hha.org/home/>

Please contact Carol or Kandi if you are interested in connecting for any of these programs.
